# WHAT IS EAGLE EYE UPTIME CONSULTING?

## Eagle Eye Uptime Consulting, LLC

offers engineering services to manufacturing facilities in need of assistance with equipment reliability problems. Eagle Eye uses a no-nonsense, hands-on approach to solving problems without the high-brow rhetoric and misapplied theory that accompanies some services. Equipment problems create a tremendous burden on the manufacturing process. The goal of Eagle eye is to efficiently identify these costly problems and implement permanent solutions that suit the needs of the customer. Whether your maintenance effort is undergoing a major overhaul or simply needs some temporary assistance, Eagle Eye can help.

MAINTENANCE  
EFFORT NEED  
A BOOST?**

## SERVICES

### Engineering Support

Need some temporary help in addressing problem spots in your process? Eagle Eye can give you a hand at any point in the process, from problem identification to implementation and follow-up.

### Reliability Basics Training

This course is designed for plant personnel from management to craftsman with a goal of showing the benefits of an organized approach to industrial maintenance.

### Maintenance Department Assessment

This tool will evaluate the effectiveness of your maintenance effort through a detailed analysis of personnel, structure and methods. Results are presented in a formal report that clearly defines areas in need of change and recommendations for improvement.

### Maintenance Training Needs Assessment

Eagle Eye can develop a customized skill assessment on your craftsmen that will indicate training needs on both an individual and department level.

### Preventive Maintenance Program Development

Whether you have a program that needs a thorough review or need a program developed from scratch, Eagle Eye can implement a PM system for the specific equipment in your facility.

### Predictive Maintenance Program Development

Eagle Eye can assist with determining the appropriate condition-based technologies in your facility to ensure that your PdM effort is cost-effective.
